HARLEM DIVISION

Time Table No. 3

FOR EMPLOYES ONLY

Taking effect

AT 12.01 A. M.

Sunday, June 18, 1905

Superseding Time Table No. 2-A, dated May 14, 1905

STUDY the SPECIAL INSTRUCTIONS and NOTE ALL CHANGES.

C. F. SMITH
P. E. CROWLEY
Ass't Gen'l Superintendents

J. P. BRADFIELD
General Superintendent

MILES BRONSON
Superintendent

A. H. SMITH
General Manager

THE DE VINNE PRESS.

SPECIAL INSTRUCTIONS.

1. Explanation of letters and signs not covered by the Book of Rules of the Operating Department:

D—Day telegraph office.
N—Day and night telegraph office.
X—Stop on Saturday.
‡—Stop to discharge passengers only.
§—Stop to discharge New York passengers only.
C—Stop on signal to receive or discharge passengers holding special cemetery tickets only.

2. Standard Clocks are located at:

Chatham, telegraph office.
Dover Plains, telegraph office.
Grand Central Station, conductors' room.
Mott Haven Junction, engine house.
North White Plains, Yardmaster's office.
White Plains, Superintendent's office.

3. Bulletin Boards or Books are located at:

Brewster.
Chatham, telegraph office and Engine Despatcher's office.
Dover Plains, conductors' room and engine house.
Golden's Bridge, passenger station.
Golden's Bridge, end of double track.
Grand Central Station, conductors' room.
" " " trainmen's room.
" " " 47th Street engine house.
Lake Mahopac.
Melrose Junction Yard, Assistant Yardmaster's office.
Mott Haven Junction, engine house.
North White Plains, engine house.
" " " Yardmaster's office.
Pawling, telegraph office.

4. Register Books are located at:

Brewster.
Chatham.
Dover Plains.
Golden's Bridge, passenger station.
Golden's Bridge, end of double track.
Grand Central Station, conductors' room.
Lake Mahopac.
Melrose Junction Yard, Assistant Yardmaster's office.
North White Plains, Yardmaster's office.
Pawling.

White Plains trains only will register at North White Plains; Lake Mahopac Branch and Golden's Bridge trains only will register at Golden's Bridge passenger station. All trains at end of double track, Golden's Bridge, will throw off register slips to operator at that point, except when they display signals for following section, in which case conductor must register in person.

5. Yard Limits, designated by signs, are located at:

Brewster.
Chatham.
Dover Plains.
Golden's Bridge.
Mount Kisco.
Pawling.
Putnam Junction.

It will not be necessary for any engine or train occupying main track within such limits to be protected, except when on the time of a first-class train. Second-class or extra trains within such limits must run at a speed that will admit of stopping within the vision of the engineman. When location or weather conditions are such as will not afford a clear view, full protection is required.

6. (Does not apply.)

7. Sidings: At sidings for meeting and passing trains, the inferior train must take the **first switch,** unless otherwise designated. The exceptions to the above rule are as follows:

Amenia—South-bound trains take East siding.

Boston Corners—All north-bound trains take West siding at cross-over north of C. N. E. Ry. crossing.

Brewster—Cross-over immediately north of freight station will be considered first switch for south-bound trains.

Copake—All trains take East siding.

Dover Plains—North-bound trains take freight house siding at cross-over at highway crossing. South-bound trains take East siding.

Patterson—All trains take East siding.

Pawling—North switch of East siding will be considered first switch for south-bound trains; passing siding north of station will be designated "engine house siding" in train orders.

Philmont—Passing siding south of station will be designated "Philmont long siding" in train orders.

Wassaic—North-bound trains take East siding.

8. (Does not apply.)

9. Use of Main Tracks:

Four tracks are in use Mott Haven Junction to Woodlawn, and are numbered 1, 2, 3 and 4, commencing with the East track. Unless otherwise directed, they will be used as follows:

Track 1 by south-bound local and second-class trains.

Track 2 by south-bound express trains.

Track 3 by north-bound express trains.

Track 4 by north-bound local and second-class trains.

Double track is in use Woodlawn to end of double track, Golden's Bridge. When running on double track all trains will keep to the left, unless otherwise directed.

Single track is in use between end of double track, Golden's Bridge, and Chatham.

10. On double track, trains not scheduled herein will run extra without train order.

11. Extra trains may run ahead of second-class trains.

12. Work extras on double track:

Work trains are authorized to work as extras on double track within specified limits. The conductor will advise the Superintendent by telegraph, before starting each morning, between what stations such train will work that day, and such train must not go outside of those limits without permission from the Superintendent, and will report when through work for the day and clear of main track.

Form of report to be sent by conductor:

Work extra, engine....., will work to-day between

.....and.....

.....

Conductor.

.....

Engineman.

13. The speed of trains is restricted, as follows:

Over switches at Mott Haven Junction . .	not to exceed	20	miles	per	hour	
Over cross-over switches at Bronx Park . . .	"	"	"	10	"	" "
From or to tracks 1 and 4 at Woodlawn . . .	"	"	"	10	"	" "
Over Railroad Avenue crossing, White Plains	"	"	"	30	"	" "
Over cross-over switch at Tower "NW" . . .	"	"	"	10	"	" "
At curve north of Valhalla	"	"	"	40	"	" "
At end of double track, Golden's Bridge . . .	"	"	"	10	"	" "
N. Y., N. H. & H. R. R. trains over switches at Woodlawn	"	"	"	10	"	" "

14. On Single Track, trains displaying green signals will sound whistle as per Rule 14k, Book of Rules of the Operating Department, while passing caboose as well as while passing engine.

15. Block Signals:

Between Mott Haven Junction and end of double track, Golden's Bridge automatic block signals of the semaphore type are in use. Where not on bridges over the tracks they govern, they are on straight or bracket posts. Signals on straight posts govern the track next to which they are located, in the direction of traffic. From Mott Haven Junction to Woodlawn, signals on East mast of bracket posts govern track 3, signals on West mast, track 4, in the direction of traffic. From Woodlawn to Mott Haven Junction, signals on West mast of bracket posts govern track 2, signals on East mast, track 1, in the direction of traffic.

The normal position of the signal blades is dropped at an angle of about 60°, showing a white light at night, indicating *proceed.* Top blades, painted red, govern main line routes; lower blades, painted red, govern diverging routes; these are known as home signals. Blades painted yellow, usually placed directly under home signals, are known as distant signals. A train entering a clear block automatically sets the signals in a horizontal position. Home signals in that position, showing a red light at night, indicate *stop;* distant signals in that position, showing a green light at night, indicate that the next succeeding home signal is in a horizontal position. Trains passing distant signals in a horizontal position must be brought under full control, prepared to stop before the next succeeding home signal is reached.

At towers, the signals, in addition to operating automatically, may be operated mechanically by the towermen. Home signals at towers are indicated by a square end with vertical white stripe; these signals are *positive,* and must not be passed when in a horizontal position except upon receipt of clearance card from towerman. All other home signals are *permissive,* and are indicated by a pointed end with >-shaped white stripe; trains finding such signals in a horizontal position must *stop,* and then proceed cautiously expecting to find a train in the next succeeding block.

If a train finds a permissive home signal in a horizontal position, and, after proceeding as above, finds no train in the succeeding block, indicating that the signal is out of order, telegraphic report must be made to the Superintendent from the next open telegraph office at which the train stops, giving the number of the signal.

The engineman of a train passing a permissive home signal as provided above will be held responsible in case of an accident caused by overtaking a preceding train; and conductors will likewise be held responsible for failure to protect the rear of train by a flagman as provided by Rule 99, Book of Rules of the Operating Department.

In order to permit towermen to manipulate switches, trains must stand at least 50 feet clear of switches at towers.

Low stand or dwarf signals, placed at points convenient to and operated from towers, govern reverse movements on main tracks and movements to and from sidings. Blades in a horizontal position, showing a blue light at night, indicate *stop*; dropped at an angle of about 60°, showing a white light at night, *proceed.*

LOCATION OF BLOCK SIGNALS.

No. of Signal North Bound.		No. of Signal South Bound.

43.6	Golden's Bridge	43.5
	North of Golden's Bridge	44.1

Signals at towers will be designated by the telegraph calls of the towers:

M. O. Mott Haven Junction.
K. Y. North end Melrose Junction Yard.
M. X. Melrose.
C. X. Bronx Park.
J. O. Woodlawn.
N. W. North White Plains.
X. End of Double Track, Golden's Bridge.

Between End of Double Track, Golden's Bridge, and Chatham telegraphic station block service is in effect, under the following rules:

At all telegraph offices, during the hours they are open, the train order signal will be placed in *stop* position after the departure of every train, as soon as rear of train has passed 300 feet beyond the signal, and left in that position until such train has been reported as clear of main track at or having left the next station in advance, when signal will be restored to *proceed* position. All following trains will be held until train so protected has been so reported, unless otherwise directed by despatcher, or in case of wire failure (see below).

Operators will promptly report arrival of any train so held to despatcher, who will, if advisable, authorize the issuing of caution cards, one of which will be given to conductor, and one to engineman, of such train, who will receipt therefor; whereupon such train will proceed with caution, expecting to find the preceding train in the next block.

No train will be permitted to follow another train into a block without permission of despatcher, except in case of wire failure, in which event, after the preceding train has been gone ten (10) minutes, operators may issue caution cards to a following train without permission from despatcher, advising conductor and engineman of such train of the conditions.

When an operator holds a train order for a blocked train, caution cards must not be issued until all train orders for that train have been completed and delivered.

When a train that takes siding at a meeting or passing point is clear of main track and switches are set and locked for

main track, the conductor of such train will promptly advise the operator, so that signal against the opposing train may be cleared.

The use of block signals of any description in no way relieves conductors, enginemen, flagmen and trainmen from properly protecting their trains as per rule:

16. Signals at Junctions:
(See Rule 98, Book of Rules of the Operating Department.)

Brewster:
Special semaphore signals, operated from telegraph office, protect use of tracks by Putnam Division trains. Normal position is dropped at an angle of about 60°, showing white light at night, indicating *proceed*. Blades in horizontal position, showing red light at night, indicate *stop*. Distant signals (straight post with two blades located at south switch): top blade governs main track; lower blade governs siding. Home signals (bracket post with two blades located 105 feet south of passenger station): blade on East mast governs main track; blade on West mast governs siding. (See special instructions below relative to use of tracks by Putnam Division trains.)

Chatham (Junction with Boston & Albany R. R.):

Harlem Division trains entering Chatham station will be governed by B. & A. R. R. semaphore signal located 630 feet south of passenger station. Blade dropped at an angle of about 60°, showing white light at night, indicates *proceed*; in horizontal position, showing red light at night, indicates *stop*.

Woodlawn (Junction with N. Y., N. H. & H. R. R.):

Blades dropped at an angle of about 60°, showing white light at night, indicate *proceed*; in horizontal position, showing red light at night, indicate *stop*.

For North-bound Trains:

Home signals governing track 3 (two blades) are on overhead bridge at passenger station, directly over that track.

Home signals governing track 4 (two blades) are on straight post, west of track, at north end of west platform.

Top blade in *proceed* position; lower blade in *stop* position; white light over red light at night; indicates all clear for Harlem Division trains. Top blade in *stop* position; lower blade in *proceed* position; red light over white light at night; indicates all clear for N. Y., N. H. & H. R. R. trains.

A special combination green and white signal on post below signals governing track 4 will be used as a flag signal for N. Y., N. H. & H. R. R. trains only.

For South-bound Trains:

Distant signals, on bracket post north of N. Y., N. H. & H. R. R. overhead bridge:

East blade and light govern N. Y., N. H. & H. R. R. trains.

West blade and light govern Harlem Division trains.

Home signals, on bracket post 175 feet north of "JO" tower (four blades):

Blades and lights on East mast govern N. Y., N. H. & H. R. R. trains; blades and lights on West mast govern Harlem Division trains.

Top blade in *proceed* position; lower blade in *stop* position; white light over red light at night; indicates route clear to track 2. Top blade in *stop* position; lower blade in *proceed* position; red light over white light at night indicates route clear to track 1.

17. (Does not apply.)

18. Signals at railroad crossings at grade:
(See Rule 98A, Book of Rules of the Operating Department.)

At Lake Mahopac (Putnam Division crossing), a two blade semaphore signal, the normal position of which, except from 8 p.m. to 5 a.m., is clear for Harlem Division and against Putnam Division trains, governs the movement of all trains. Top blade and light govern Harlem Division trains; lower blade and light govern Putnam Division trains. Blade dropped at an angle of about 60°, showing white light at night, indicates *proceed*; in a horizontal position, showing red light at night, indicates *stop*.

At Millerton (N. D. & C. R. R. crossing), and **Boston Corners** (C. N. E. Ry. crossing), signal gates with large red disks, which may be swung across the main track of either road, govern the movement of all trains. At night a red light is shown from the center of the disk. The normal position of these gates is across the tracks of the N. D. & C. R. R. and C. N. E. Ry.

At Port Morris (N. Y., N. H. & H. R. R. crossing; interlocked), home signals of the semaphore type, the normal position of which is against Port Morris Branch trains, govern the movement of all trains. Blades dropped at an angle of about 60°, showing white light at night, indicate *proceed*; in a horizontal position, showing red light at night, indicate *stop*.

19. Trains running over other divisions or railroads are subject to the rules of such division or railroads, and all concerned must provide themselves with copies of such rules and current time-tables.

Between Grand Central Station and Woodlawn trains will be governed by and run in accordance with Joint Time-table of this Division and the Harlem Line.

---

51. Putnam Division Trains will use the tracks of this Division between Putnam Junction and Brewster only after receiving telegraphic order from operator at Brewster, reading: "Putnam Division train No.— will run from Putnam Junction to Brewster on (siding or main track), regardless of northbound trains." A flagman must be left at Putnam Junction to protect against south-bound trains. The return movement from Brewster to Putnam Junction will also be made under such protection. Before issuing such order, operator at Brewster must place special signal, south of Brewster station, governing north-bound trains on track to be used, in *stop* position, and such signal must be left in *stop* position until the protected Putnam Division train has left the tracks of this Division. All Harlem Division trains must approach Brewster, north-bound, and Putnam Junction, south-bound, under full control, prepared to stop if signals are against them.

52. Port Morris Branch:

Double track is in service between "MX" tower and Westchester Avenue Yard. All trains will keep to the left between these points, unless otherwise directed. Single track is in service between Westchester Avenue Yard and Port Morris under the following rules: From 6.30 A.M. to 7 P.M. (except Sunday), Port Morris switch engine is superior to all trains. From 7 P. M. to 6.30 A. M. (including Sunday), Melrose Junction switch engine is superior to all trains. From 6.30 A.M. to 7 P. M. (Sunday only), Melrose Junction switch engine is superior to all trains.

53. Fixed Signals of the semaphore type are connected to main line switches between Golden's Bridge and Chatham, located as a rule about 1500 feet from the switch. The blades dropped at an angle of 60° or more, showing white light at night, indicate that switch is set for main line, *proceed*; in horizontal position, showing red light at night, that switch is set for siding, *stop*. These signals must not be passed when in stop position unless it is ascertained that they are not in working order, in which case a train may proceed with caution. **These signals must not be used for the protection of trains.** (See rule 99, Book of Rules of the Operating Department.)

54. Between New York and North White Plains the rules for calling in of flagmen by steam whistle signals will not apply. In every instance flagman will remain out until picked up by the following train.

55. Baggage will not be handled at 110th Street, 183rd Street, Claremont Park, Wakefield and North White Plains.

56. North-bound trains, running north of Mount Kisco, scheduled to stop at 125th Street and 138th Street, stop at those stations to *receive* passengers only.

On single track, north-bound trains are superior to south-bound trains of the same class, unless otherwise specified.
No. 94 will carry passengers north of Dover Plains only.
No. 54 will run June 25th to October 1st inclusive, except Sunday, July 2nd, and Sunday, September 3rd; will be run as an extra Tuesday, July 4th, and Monday, September 4th.
No. 49 will take siding at Patterson for No. 50, and at Dover Plains for No. 54.
