SPECIAL INSTRUCTIONS

Rules referred to by numbers are the Rules for the Government of the Operating Department, unless otherwise specified.

N 2. THIRD RAIL.

When emergency requires that power be shut off third rail, telephone nearest substation, stating what tracks are affected and immediately notify train dispatcher. If pipes carrying transmission cables are involved, the load dispatcher must be notified promptly.

Power will not be restored until load dispatcher has been notified by responsible person that it is safe to do so. Load dispatcher must secure permission from train dispatcher to restore power if trouble was due to train accident.

If engineman desires power shut off, he will stop and sound whistle signals prescribed by Special Instruction 14, and repeat same until power is shut off. Conductor of such train will immediately communicate with nearest substation, load dispatcher or train dispatcher, requesting power to be shut off tracks affected and asking for other necessary relief. All employees hearing these whistle signals must also make immediate request by telephone to have power shut off tracks affected. Maintainers, trackmen and other employees must go to point of trouble promptly and render any assistance possible.

To shut power off in Park Ave. tunnel, give cord, suspended from wall on adjacent track, a steady pull first from the west and then from the east, which will shut power off track affected between 56th St. and 110th St. When cord is pulled, or when trains are stopped in tunnel because of loss of power, report must be made at once to train dispatcher from nearest telephone. Train employees and others who do work in the tunnel must familiarize themselves with location of cords and boxes to which they are attached. These cords and appliances belonging to this system must not be tampered with.

When emergency requires that power be shut off third rail on any track between 110th St. and Mott Haven Jct., third rail switch at Signal Station NK, 106th St., or at cabin at east end of Park Avenue Drawbridge will be closed and held closed 3 seconds. The closing of one of these switches shuts power off all tracks between 110th St. and Mott Haven Jct. Employees shutting power off must at once notify Load Dispatcher that third rail switch has been closed, and the same employee must also notify Load Dispatcher promptly when it is proper to have power restored.

When communicating by telephone to have power shut off, use words "power emergency," and when by telegraph, use numeral "31" to obtain circuit. All others using line must give way at once.

When two or more electric trains have been stopped on the same track short distances apart, a period of 30 seconds must elapse between the starting of each train.

Electric and Steam Cranes.

No cranes except G. C. T. No. 1 and X21 will be moved on main tracks without permission from the Superintendent.

Between 59th St. and 95th St.: Steam crane X21 must not be operated on Track No. 2.

Between 110th St. and 140th St.:

Cranes G. C. T. No. 1 or X21 may operate under own power or may be hauled by steam or electric locomotive when two cars of moderate weight not heavily loaded are placed between locomotive and crane. No equipment, except M. U. trains, may come abreast of or pass cranes on adjacent track normally operated in same direction as the one on which crane is running.

Cranes shall not lift any load on Park Ave. viaduct unless structure is properly braced and the Division Engineer or his representative has given authority for such operation.

G. C. T. G. C. T. crane No. 1 must not lift weight to exceed 25 tons on steel work on upper level.

1403. EMERGENCY OPERATION.

In event of irregularity or accident occurring to a train which endangers safety of passengers or train, notice must be given promptly to the engineman who will proceed with train, if safe to do so, to nearest station or first opening to street, if necessary to discharge passengers. In Park Ave. tunnel, exits to street are located at 59th, 72nd and 86th Sts. On the viaduct, passengers may descend to street at 110th St. If train is on descending grade, it may be possible to proceed without power to points at which passengers may be discharged.

If necessary to operate a multiple unit train from other than first car, conductor and engineman will confer, and be held jointly responsible for safe movement of train, at speed permitting full control, to the first siding where defective car must be set out.

1406. TELEPHONES.

Conductor or engineman must use telephones whenever necessary to facilitate the movement of trains. Instructions received by telephone must be repeated, and names and occupation of the employees exchanged to avoid misunderstanding.

Substation telephone circuits are exclusively for the use of employees in controlling current to third rail and signal lines, and in train emergency.

1407. ELECTRIC EQUIPMENT.

An electric engine may coast through water not higher than 15 inches above base of rail, provided engine will pass through within 3 minutes.

Three or more electric engines or electric and steam engines coupled must not be moved on main tracks except upon order of the Superintendent.

If more than 2 electric engines are coupled, power must be used on 2 only.

When third rail shoes are broken off, shoe fuses over broken shoes must be removed.

When overhead shoes are broken off, train or engine must come to a stop immediately and remove broken parts from track and train.

If emergency button of master controller on an MU car is inoperative and car cannot be cut out, a man must be assigned to ride with engineman.

West of 56th St.:

The cut-out cock in air pipe leading to overhead shoe on electric locomotives must be closed when not in use.
