Linndale, West 130th St.: Trains or engines using No. 4 All tracks in the electric engine house, Collinwood and Linndale.

Main track No. 3 between Central Ave. and Cleveland Union Terminal. Switching lead, Nickel Plate transfer and coach yard tracks

between Cleveland Union Terminal, East 9th and East 37th Sts. All tracks in station and coach vard area. Cleveland Union

Ohio.

- Terminal.
- Nickel Plate connection, West 25th St. and Nickel Plate main tracks to West 38th St.
- Side tracks north and south of main tracks Nos. 1 and 2, CF Signal Station to a point just east of West 130th St., Linndale.

When emergency requires that power be shut off overhead trolley, telephone Chief Train Dispatcher or Power Supervisor, stating what tracks are affected.

Power will not be restored until Chief Train Dispatcher or Power Supervisor have been notified by responsible person that it is safe to do so. Power Supervisor must secure permission from Chief Train Dispatcher to restore power.

If the engineman requires power shut off, he will stop and use whistle signals prescribed by Special Instruction No. 14, and repeat same until power is shut off. Conductor of such train will immediately communicate with Chief Train Dispatcher or Power Supervisor, requesting power be shut off tracks affected and ask for other necessary relief.

All employes hearing these whistle signals must also make immediate request by telephone to have power shut off tracks affected.

The display of green signals will be omitted on two or more tracks.

Maintainers, track men and other employes must go to point of trouble promptly and render any assistance possible. When communicating by telephone to have power shut off, say 'Power Emergency' to obtain circuit. All others using line

Electric locomotives when moving or being moved from an energized section to a dead section, or from a dead section to an

tives must be closed at all times when operated in electric

C. may proceed over the crossing at a speed not to exceed 15 miles per hour withour stopping when targets indicate proceed. |
| |

305. MANUAL BLOCK SYSTEM.

Manual Block System is in use:

Single Track:

Between Phalanx and Dillonvale.

Hugo and Warner.

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.

Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

Two or more Tracks:

Between Brady Lake and Hugo. Warner and Marcy.

Rules 318-A and 331-A for absolute block for following movements only, govern the movement of passenger trains.

Rules 318-B and 331-B for permissive block, for following movements only, govern the movement of trains other than passenger trains.

Single and Two or More Tracks:

Rules 317-B, 318-B and 331-B do not govern within yard limits

Indications of Manual Block Signals will convey to second class and extra trains information as to condition of that portion of the block that is not within yard limits. Second class and extra trains and engines must move within yard limits prepared to stop unless the main track is seen or known to be clear.

At interlockings where home (or dwarf) signals are also used as manual block signals, enginemen or trainmen must before passing stop-signal, in addition to clearance Form A, receive hand signal as provided in Rule 663, or permission from the signalman.

Where an automatic signal is in use in Manual Block territory, it will indicate condition of track only between automatic signal and fixed signal reading "End of Automatic Block."

373. BLOCK STATIONS ARE OPEN.

Block stations are open as specified in list of Stations, Office Calls, Signals and Telephones.

505. AUTOMATIC BLOCK SYSTEM.

Automatic Block System is in use: Single Track:

Between DK and Clark Ave.

Two or More Tracks:

Between BR and BE via Cleveland Union Terminal. OD and Belt Jct., via Marcy. OD and C. & P. Crossing.

West end Cuyahoga River Bridge and BE.

Automatic signals are in use in Manual Block territory as specified in list of Stations, Office Calls, Signals and Telephones. When signal 179.3A located at East 55th Street indicates "STOP," Trains or Engines may proceed when authorized by train dispatcher.

606. INTERLOCKING SIGNALS.

Interlocking signals used as block signals will be indicated by the letters INT.-M.B. in list of Stations, Office Calls, Signals and Telephones.

703. DEFECTIVE CARS.

Cars must not be placed forward of 15 cars from caboose when so carded. So far as possible, inspectors must apply these cards to cars requiring such movement prior to trains being made up in the yard.

SNOW PLOW EQUIPMENT.

Snow plows must not be hauled backward when being moved in freight train.

MAKE-UP OF FREIGHT TRAINS.

Cranes in non-revenue trains must be hauled ahead of cars occupied by crew unless otherwise instructed,

Scale test cars must be hauled only in slow or local freight trains

705. LEAVING CARS ON SIDETRACKS.

During cold weather, when cars equipped with water system are left where there is no car inspector, conductor must notify Superintendent promptly. When impossible to place cars on steam and car inspector is not available, the steam connections should be parted and end valves, admission valves and blow off or drain valves opened. The water system should be drained by opening faucets at wash basin and drain valves in wash basin and behind hoppers. On cars not equipped with drain valve behind hopper, the hopper valve handle should be tied open. Water coolers should be drained. Steam Heat Equipment Rule 1725 is modified accordingly.

Cars must not be left bridging across insulated joints in track rails where tank cars are placed.

Cars with hot journals must not be left on any track in close proximity to where gasoline is loaded or unloaded.

824. MAKE-UP OF PASSENGER TRAINS.

Passenger equipment must be of steel construction with the exception that baggage, horse, refrigerator and milk cars of steel underframe construction may be hauled, also such steel underframe passenger cars as are used under special arrange ment

841. U. S. MAIL.

CLEVELAND

DIT

A train handling a postal car off its run must also make the stops of the train in which it is usually handled.

When necessary, in case of derailment or washout, employes must see that postal clerks and mail are promptly transferred and every possible convenience furnished for working the mail.

Railroad employes are required to handle, load and unload storage mail carried in baggage and storage cars, and in baggage end of apartment cars.

The loading of U. S. Mail must be given preference over baggage and express. Conductor must not start train until the handling of U.S. Mail is completed. Trains scheduled to stop to discharge passengers, and having U.S. Mail for such points, must stop to unload mail.

A train shall not depart from a station and leave mails which are being loaded or are being trucked from vehicles or from part of the station to the train or aboard a connecting train that has come to a stop in the same station.

Mail should not be carried on trains not regularly authorized to carry same unless requested in writing to do so by a representative of the Railway Mail Service.

When a train is regularly authorized to carry U.S. Mail, all mail offered at stations where the Post Office Department does not maintain a Transfer Clerk or Postal Clerk should be accepted regardless of the space authorized.

When a regular authorization is exceeded from any station at which the Post Office Department maintain a Transfer Clerk or Postal Clerk, the trainmen should secure a written request covering such excess. Failure to receive such request should be reported on the trip report of mail carried.

The Post Office Department Regulations provide the number of sacks, equivalent

| or sucho, equivalent to units of | space authorized as follows: | 1 |
|----------------------------------|-----------------------------------|---|
| 49 sacks or less equal 3 ft. | 246 to 294 sacks equal 18 ft. | |
| 50 to 98 sacks equal 6 ft. | 295 to 343 sacks equal 21 ft. | |
| 99 to 147 sacks equal 9 ft. | 344 to 392 sacks equal 24 ft. | 1 |
| 148 to 196 sacks equal 12 ft. | 393 to 441 sacks equal 27 ft. | |

197 to 245 sacks equal 15 ft. 442 to 490 sacks equal 30 ft. Utmost care must be used in handling fragile (red label)

parcel post mail.

Mail pouches delivered unlocked must not be accepted but returned to Post Office Department, and immediate advice given to Superintendent by wire.

When mail arrives late at night, or when Government messenger is not on hand to receive it, it must be kept in a safe place until proper delivery can be made.

If a mail pouch is stolen, immediate advice must be given to Superintendent by wire.

U. S. Mail Clerks, required to deadhead on mail trains, will be permitted to ride in crew coach on presentation of their photograph commission.

Train crews are not permitted to ride in Railway Post Office cars while in use, even though the railroad company may furnish a Railway Post Office car larger than the size authorized.

All full mail cars and parts of cars having the legend "United States Mail" or "U. S. Mail" shall be reserved exclusively for carrying the mails and shall not be used for any other purpose.

916. HEATING, LIGHTING, VENTILATION AND AIR CONDITIONING OF CARS.

Rules for the Operation and Supervision of Steam Heat Equipment. Current rules govern. The application of Steam Heat Equipment Rule No. 1724 is

| Approaching | Direction | Open rear end train pipe valve | Engineman shut off steam at |
|-------------------------|-----------|-----------------------------------|--------------------------------|
| Linndale Cleveland | Eastward | Short Line Junction | W. 130th Street |
| Union Term. | Eastward | Signal 530 | Signal 480 |
| Collinwood | Eastward | | |
| Collinwood Cleveland | Westward | Nottingham | QD Signal 175.1 |
| Union Term. | Westward | E. 34th St. | Eagle Avenue |
| Linndale | Westward | | CF Tower |

Rear end train pipe valve must be opened gradually to full open position when blowing out steam line to avoid metal gaskets being blown off.

When one or more of the first five cars in train are equipped with rubber steam hose and 130 pounds steam pressure is not sufficient to properly heat the train, pressure may be increased to 150 pounds. Steam Heat Equipment Rules Nos. 1706, 1707 and 1712 are modified accordingly.

Before steam pressure is connected to standing cars, train line valve must be closed at opposite end of line.

917. PASSENGER BRAKEMEN.

Rear brakemen of passenger trains will be governed as

| ien | And car | Carry equipment in f | ollowing location: |
|---------------|--------------------|--|---|
| ar is | next ahead is | Storm clothing | Container and lanterns |
| nan | | | |
| s. te or | Pullman | On door catch of aisle door next to rear car | |
| cial xe | Pullman | if drawing room is next to rear car. If | of passageway and |
| s., | Pullman | not, place in rear ves- | avoid inconveni- |
| n, •. | Pullman Pullman | tibule of car next to rear. | ence to passengers using vestibule. |
| | Coach | Rear of coach. | Rear of coach. |
| an hout | | On door catch of aisle door at rear of train. | |
| erva- end. | | | inconvenience to persons using ves- tibule. |

When more than one private car, conductor will instruct rear brakeman where equipment will be carried. Grips or other personal effects not required in line of duty must not be carried at rear of train.

HAND BRAKE TEST.

A running test of hand brakes must be made on a motor car upon leaving initial terminal when operating as a single unit. As soon as speed permits engineman must shut off power and signal for brakes. The Conductor or member of train crew must then apply hand brakes to determine if they are operating properly. In case hand brakes do not operate properly, motor car must proceed at restricted speed to the nearest point at which repairs can be made.

932. AIR BRAKES.

Rules for the Operation and Supervision of Air Brake and Train Air signal. Current rules govern.

The note at foot of Air Brake Rule 1554 issued in paster form. modifying Rule 1554 of Rules for the Operation and Supervision of Air Brake, etc., Current Rules, is modified as follows: Note — It will be observed from the foregoing that the loco-

motive brake should be permitted to apply with the train brakes when making running tests, unless in the judgment of the engineman, it is necessary to prevent the locomotive brake applying to avoid stalling.

Mount Union: Northward freight trains must stop and test air brakes, taking up slack if necessary. Enginemen must not start train until they have full train line and main reservoir pressure. If engineman is in doubt as to his ability to control the train by air, he must notify the conductor and the train must descend Mount Union Hill in such portions as can be controlled by air.

1056. JOURNAL BOXES.

Current "Instructions for the Lubrication and Care of Journal Boxes" govern.

When a journal is found overheating enroute, train must be stopped and examination made. Packing must be adjusted or box repacked if this will overcome trouble. If cause of heating cannot be corrected in this manner or car cannot be moved to the next terminal through the use of cooling compound, car should be set out.

Water or snow should not be used for cooling hot journals except in emergency, and when used, journal should be cooled as slowly as conditions will permit.

When cars with hot journals are set out where inspectors do not take immediate charge, precaution must be taken to know that journal is left in condition to avoid damage to car by fire.

Conductor must make prompt report to Superintendent and car foreman of cars treated enroute, or set out account overheated journal, stating whether treated by cooling compound or by water or snow.

COOLING COMPOUND.

An approved hot journal cooling compound, and Form N.Y.C.S. RS-74, furnished by storekeeper, shall be carried as part of caboose equipment, and train crew equipment in passenger service.

Cooling compound shall be used for emergency treatment of overheated journals of cars enroute in trains. Treatment should be given before journal becomes red.

SPEED RESTRICTIONS

DIVICION

Speed restrictions are shown in miles per hour and apply to entire train.

| General |
|---------|
| |

| 0 | CITCINE |
|--|---|
| Engines, Class B and U under steam or being towed. 20 Engines running backward by night over public crossings. 14 Railroad grade crossings, interlocked. | 5 Circu 7 Train Work 5 Reve 60 Freig 8 Swit Rail 0 pa: 0 Note |
| | |

Journals with broken brasses shall not be treated with cool-

When applying cooling compound, packing in journal box should be loosened by use of packing iron, after which, cooling compound shall be applied along full length of rising side of journal; particular attention to be given to placing compound at back or inside end of journal.

Cars having journals treated with cooling compound shall be tagged in a prominent place near journal box, using Form N.Y.C.S. RS-74, at time compound is applied.

FATALITIES.

When a passenger dies in a sleeping car, the body may be left in berth properly screened until removed from train; when in parlor car or coach, body should be removed to baggage car and physician secured if available on train, who may certify as to cause of death.

The body of a person who dies on a train must be left at first station stop where a Health Officer is available and station employe on duty. Station employe must not permit the body to be removed from station without proper authority. If person who dies is accompanied by an attendant, conductor must confer with attendant as to disposition of body, and such information must be given to the station employe.

If train stops at a station other than where the body can be removed, conductor will give advance notice to the station where the body is to be left, and station employe must notify Health Officer promptly.

MOVEMENT OF DEAD ENGINES IN TRAINS.

Rules for the Operation and Supervision of Air Brake and Train Air Signal. Current Rules govern.

All engines equipped with side rods must have them applied when handled dead in trains, suitable washers, of wooden blocks clamped together with bolts, being used where necessary on main rod bearings to keep the side rods in place.

U. S. No. 2 Mine empty tracks, crossovers to tipple.....All engines.

Egypt:

Hawthorden State Hospital track over pit.....All engines.

SPECIAL USE OF TRACKS.

Cleveland Terminal District:

Account of close clearance, passenger trains must not be operated on (north) main track or (south) No. 1 Depot Track between Double Track Yard Office and Big Four crossing, except when curve in adjacent track just west of C. & P. Crossing is clear.

Account of close clearance, passenger trains with new streamlined equipment also N. R. C. refrigerators series 700 to 799 must not be operated on either Big Four main tracks at St. Clair Avenue, except when the curve in adjacent main track is clear.

Westward siding No. 3 between Detroit Ave. and West 150th St., and Eastward siding No. 4 between Belt Jct. and West 58th Street will be under the control of the train dispatcher and trains or engines will not use or occupy these tracks without permission from the train dispatcher.

Trains or engines must not use or occupy the East Wye track between Rockport and the Junction switch with No. 4 siding without permission from the train dispatcher.

Whiskey Island: Trains or engines must obtain permission from train dispatcher by telephone to use eastward side track.

Trains or engines from W. & L. E. connection located east of Clinton Road will obtain permission from operator at CF before fouling N. Y. C. tracks.

Trains or engines using main track between DK and Clark Ave., and No. 4 main track between Clark Ave. and CF will report to train dispatcher from nearest telephone when clear at intermediate points. Trains or engines taking switching lead located between DK and Clark Avenue, south of main track, will at DK and Clark Avenue proceed on signal indication, except when stopping to set off or pick up cars, permission must also be obtained from operator. When clear of switching lead at intermediate points must report when clear, and also must obtain permission from operator at Clark Avenue, by telephone, before fouling switching lead at any intermediate point.

L. E. & P. Branch:

Trains stopping on westward track between Brady Lake and Hugo must pull far enough west of the bridge which spans the P. R. R. tracks so that no part of the train will stand on the bridge.

Alliance Branch:

Trains or engines will not use or occupy D. & S. branch track between Dillonvale and Smithfield without permission from operator at Dillonvale or from the train dispatcher.

AUTOMATIC TRAIN STOP.

Enginemen and firemen must be qualified on rules for the operation of automatic train stop.

Road engines and motors, operated between BR and BE, via Lake Front, and between CF and BE also between QD and CF, electrified zone, must be equipped with automatic train stop device in working order, and cut in, except:

a. When used as pusher or second engine.

- b. By specific authority of Superintendent.
- c. When automatic train stop device becomes inoperative after leaving terminal, passenger, mail, express and milk trains must be operated at a speed not exceeding 35 miles per hour, and other trains at a speed not exceeding 20 miles per hour. Engineman must notify Superintendent at first communicating station, and relief engine, if available, must be obtained at first engine terminal.

When forestalling whistle fails to sound while forestalling, engineman will reduce to and operate at speed specified in paragraph C until he has occasion to again forestall as prescribed by the rules, and the whistle sounds; normal speed may then be resumed. Failure of whistle to sound must be reported on form SC-1.
