SPECIAL INSTRUCTIONS

Rules referred to by numbers are the Rules for the Government of the Operating Department, unless otherwise specified.

0. OBSERVANCE OF PASSING TRAINS.

When trains are passing, trainmen of freight trains must observe the general condition of trains on other tracks for the entire length of each train.

When a freight train is standing, trainmen of that train must place themselves in best position on ground to observe running gear of passing passenger trains, and, when other duties do not interfere the same observation must be made of passing freight trains.

When approaching track pans or immediately after passing them, and frequently at other points, rear trainmen must observe each side of their train.

When trains are passing, signalman or operator, whenever practicable, must observe from signal station or station platform, the condition of the train for its entire length. Trackman, Bridgemen, Signal Maintainers, Pumpers and other employes must make similar observations.

If any indication of conditions endangering a train is observed, 'Stop' signal must be given. If there are no apparent defects, employes, except crossing watchmen, must give 'Proceed' signal.

All signals must be acknowledged.

Passenger trainmen will comply with the above as far as practicable.
