SPECIAL INSTRUCTIONS

Special instructions prefixed by letter or number modify Rules for the Government of the Operating Department with corresponding letter or number, unless otherwise specified.

B-3. LAWS AND REGULATIONS.

Ohio.

At railroad crossings and junctions at grade, not interlocked, all trains must come to a full stop, not nearer than two hundred (200) feet, nor farther than five hundred (500) feet from the crossing, and shall not cross until signaled to do so by the watchman nor until the way is clear.

Cabooses must not be occupied while helper engines are coupled to the rear of the caboose and assisting trains.

Trainmen will take position on other cars in train, or upon helper engine.

Trains being assisted will stop to detach helper engine and allow trainmen to return to caboose.

REPORTS.

When a train or engine crew has been on duty 14 hours, the conductor must send report to the Superintendent by wire.

When car of live stock is due to be fed, rested and watered within 3 hours, the conductor must send report to the Superintendent by wire.

DEFECTIVE CARS.

Cars becoming defective enroute when loaded with live stock or perishable freight may be hauled by chains instead of couplers to next repair point, and when so hauled at the rear of caboose must be chained in addition to being coupled unless the air brakes are in service.

Other defective cars must not be hauled by chain in revenue trains or in association with cars commercially used, beyond the first side track.

103. PUBLIC GRADE CROSSINGS.

When switching or when trains or cars are left standing on the approach track circuit of a highway flashing light signal, causing the continuous operation of the signal, a member of the crew must, when practicable, be stationed at the crossing to facilitate highway traffic, advising such traffic when it is safe to cross.

All switching movements must be protected by a member of crew acting as flagman over the following crossings:

Norwalk: Milan Ave.
 Prospect Street.
 Foster Avenue.
 Wooster Street.
 Whittlesey Avenue.
 Clyde: Main Street (Route 101).
 Fremont, Ohio: Croghan Street.
 Garrison Street.
 Birchard Avenue.
 Auburn: Eleventh Street.
Trainmen must flag trains or engines over the following crossings:
 Sandusky: Milan Road, when making reverse movements on tracks 1 and 4.
 Bellevue: Monroe Street—Sunday only.
 Fremont: Napoleon St. between 4 P. M. and 10 P. M. except Sunday.
 Holland: Quarry Track, Chicago Pike.
 Goshen: Bag Track, Chicago St.
 Lateral Track, Pike St.
 Hillsdale: Union St. in moving from siding to main track, while cars or engines are standing upon Old Road main track between Union St. and passenger station.
 Pleasant Lake: Highway 727 first crossing north of station.
 Waterloo: West Lincoln St., all movements.
 Monroe: First and Monroe Sts.: Trains and engines must stop and be preceded over crossing by a member of crew who will flag trains across street in accordance with indication of traffic lights.
 Sturgis: G. & M. Branch, Chicago, St. Joseph and West Streets.
 Litchfield: Lansing Branch, main track and spur track Highway M-49.
 Fort Wayne: St. Marys Ave., Wells and Cass Sts.
 Fourth St., between 7 P. M. and 7 A. M.
 Harrison St., between 5 P. M. and 9 A. M.
 West Main St., crews must operate and be protected by crossing gates before using crossing.
Flashing Light Signals, and Automatic Gates:
 Shawville —State Route No. 76 (Beldon Road).
 Oak Harbor —Locust Street
 Rocky Ridge—Main Street
 Dunlap —County Road No. 13
 Elkhart —Hively Avenue
 Trains or engines operating on other than main tracks must proceed slowly past sign adjacent to track and approximately 50 feet from crossing and not cross highway until gates are in horizontal position.
 Trains or engines on main track stopping to do work must stop back of signs. When starting, if gates are raised, must proceed slowly by sign and not cross highway until gates are in horizontal position.
 When a train moves over a public crossing at grade and a back up movement over such crossing is to be made, the crossing must be protected by member of crew unless gates are in horizontal position.
Trains or Engines must stop before moving over the following crossings:
 Tecumseh: Chicago St.
 Monroe: Highway, US-24, just west of C.&O. crossing, between 7:00 P. M. and 7:00 A. M.
 Goshen: East Lincoln Ave. (G. & M. Branch).
 Hillsdale: On either side of Carleton Road just South of the Enginehouse, irrespective of the movement being made over the East or the West wye.
 Sturgis: Nottawa St. (1st crossing East of station). Trains or engines must come to a stop on either side and cross only under flag protection by a member of train crew
 Bryan—Highway U. S. 127, East of "DV".
 Track 4 extension, must not proceed over crossing until flashing lights are operating.
 Auburn (Siding across Seventh St.): Flashing light signals to be started by insertion of switch key in box "A" and turning it to the right against "Stop", after which it can be removed. To stop flashing lights without train movement across street, insert switch key in box "B" and turn to right against "Stop".
Trains must be left on main track, unless taking siding, as follows:
 Hudson: Eastward, west of subway.
 Westward, At least 2 car lengths west of cross-over.

Crews on eastbound trains having cars to set out or pick up at the Pet Milk Company must leave train west of the insulated joints, about 100 feet west of the crossing, painted yellow, to avoid the unnecessary flashing of the lights on route M-34.

Vermilion: Westward, trains on No. 1 track being held or stopping to do work must leave cars East of stop sign reading "Trains stopping to do work must leave cars East of this point."
 Huron: Eastward, trains on either No. 2 or No. 4 tracks being held or stopping to do work must leave cars West of stop sign reading "Trains stopping to do work must leave cars West of this point."

104. BRIMFIELD.

Operators at Brimfield will open the switch to the Westbound passing track for the passing of trains, switch will be closed by the train crew.

Rule 221b governs at stations where T.O. signals are shown in list of stations, Office Calls, Signals and Telephones

D-251. MOVEMENT OF TRAINS WITH CURRENT OF TRAFFIC ON TWO OR MORE TRACKS BY BLOCK SIGNALS

Rule D-251 governs:
Between BE and Vickers, via Sandusky.
Nasby and B.

SIGNAL ASPECTS, INDICATIONS, and RULES.

Special signal aspects, signal indications and signal rules will be found in the back of the time table.

TAKE-SIDING SIGNAL.

Take-siding signal will be given by the display of a green board by day and the green board and two green lights by

night. This signal applies only to the movement of freight trains with the current of traffic and will be displayed on the ground at, or from the window of communicating station. Engineman must acknowledge the display of the signal by sounding engine whistle signal 14 (g).

GRADE SIGNALS.

A yellow disc, showing the letter G, displayed to the right of an automatic signal, indicates grade signal. Grade signals must be observed as prescribed in Rule 291, except heavy tonnage freight trains will not be required to stop, but may proceed as prescribed in Rule 509a.

293. SWITCH TARGETS.

305. MANUAL BLOCK SYSTEM.

Manual Block System is in use:
Single Track:
Between Elyria Jct. and Millbury Jct. via Norwalk.
Vulcan and "B".
Grosvenor and Morenci.
Haires and Fort Wayne Jct.
Hillsdale and Fort Wayne.

OD and Lenawee Jct.
Sturgis and Goshen.
Monroe and Lenawee Jct.

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.
Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

Single and Two or More Tracks:

A signalman may admit a train other than a passenger train to a block that is wholly or partly within yard limits under a clear block indication when it is known that the block is not occupied by a passenger train or not occupied by a train other than a passenger train outside of yard limits.

Indications of Manual Block Signals will convey to second class and extra trains information as to condition of that portion of the block that is not within yard limits. Second class and extra trains and engines must move within yard limits prepared to stop unless the main track is seen or known to be clear.

At the following locations, indication of block signals will convey to trains, irrespective of class, information as to condition of block only to "End of Manual Block" signs:
Haires, Hillsdale and Fort Wayne..... Fort Wayne Branch.
Between the "End of Manual Block" sign at Haires and signal station "OD", also between "End of Manual Block" signs and the passenger stations at Hillsdale and Fort Wayne, trains, irrespective of class, will run prepared to stop short of obstruction, protecting against following movements.

At interlockings where home (or dwarf) signals are also used as manual block signals, enginemen or trainmen must before passing stop-signal, in addition to clearance Form A, receive hand signal as provided in Rule 663, or permission from the signalman.

Where an automatic signal is in use in Manual Block territory, it will indicate condition of track only between automatic signal and fixed sign reading "End of Automatic Block."

373. BLOCK STATIONS ARE OPEN.

Block stations are open as specified in list of Stations, Office Calls, Signals and Telephones.

505. AUTOMATIC BLOCK SYSTEM.

Automatic Block System is in use:
Two or More Tracks:
Between BE and Vickers, via Sandusky.
Nasby and B.

When Signals A-5.2 and A-5.4, West of Nasby, do not display Rule 284 indication, trains will not proceed to Home Signal unless rear of train will clear Byrne Road.

Except where Rule D-261 is in effect, Manual Block System Rules will govern movements against the current of traffic.

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.

Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

Automatic signals are in use in Manual Block territory as specified in list of Stations, Office Calls, Signals, and Telephones.

510. SIGNAL REPORT.

When a train is stopped by a block signal which is evidently out of order, the fact must be reported by engineman at the first communicating station.

605. REMOTE CONTROL SWITCHES AND SIGNALS

Location	Signal Station	Signal	Tracks
1.50 Miles west of.....	Vermilion....	S14.2....	No. 2 to No. 4
1.28 Miles east of.....	Coranna.....	A84.1....	No. 1 to Siding
1.23 Miles west of.....	UK.....	A93.2....	No. 2 to Siding
1.0 Miles west of.....	Brimfield....	A100.2....	No. 2 to Siding

Interlocking rules govern.
Enginemen or trainmen finding signal indicating Stop must call signalman at signal station.

Train or engine may proceed on instructions from signalman after switch is spiked or thrown by hand-throw lever of dual control switch. Movement must be made at restricted speed.

Additional instructions for hand throwing of switch are located in signal station and in telephone box at switch.

606. INTERLOCKING SIGNALS.

Interlocking signals used as block signals will be indicated by the letters INT.-M.B. in list of Stations, Office Calls, Signals and Telephones.

703. DEFECTIVE CARS.

Cars must not be placed forward of 15 cars from caboose when so carded. So far as possible, inspectors must apply these cards to cars requiring such movement prior to trains being made up in the yard.

SNOW PLOW EQUIPMENT.

Snow plows must not be hauled backward when being moved in freight train.

MAKE-UP OF FREIGHT TRAINS.

Cranes in non-revenue trains must be hauled ahead of cars occupied by crew unless otherwise instructed.

Scale test cars must be hauled only in slow or local freight trains.

705. LEAVING CARS ON SIDETRACKS.

During cold weather, when cars equipped with water system are left where there is no car inspector, conductor must notify Superintendent promptly. When impossible to place cars on steam and car inspector is not available, the steam connections should be parted and end valves, admission valves and blow off or drain valves opened. The water system should be drained by opening faucets at wash basin and drain valves in wash basin and behind hoppers. On cars not equipped with drain valve behind hopper, the hopper valve handle should be tied open. Water coolers should be drained. Steam Heat Equipment Rule 1725 is modified accordingly.

Cars must not be left bridging across insulated joints in track rails where tank cars are placed.

Cars with hot journals must not be left on any track in close proximity to where gasoline is loaded or unloaded.

824. MAKE-UP OF PASSENGER, MAIL, EXPRESS AND MILK TRAINS.

Passenger equipment must be of steel construction with the exception that baggage, horse, refrigerator and milk cars of steel underframe construction may be hauled, also such steel underframe passenger cars as are used under special arrangement.

Trains containing more than 5 cars 60 ft. or over in length, limited to 30 cars.

Trains containing not more than 5 cars 60 ft. or over in length, limited to 40 cars.

841. U. S. MAIL.

A train handling a postal car off its run must also make the stops of the train in which it is usually handled.

When necessary, in case of derailment or washout, employes must see that postal clerks and mail are promptly transferred and every possible convenience furnished for working the mail.

Railroad employes are required to handle, load and unload storage mail carried in baggage and storage cars, and in baggage end of apartment cars.

The loading of U. S. Mail must be given preference over baggage and express. Conductor must not start train until the handling of U. S. Mail is completed. Trains scheduled to stop to discharge passengers, and having U. S. Mail for such points, must stop to unload mail.

A train shall not depart from a station and leave mails which are being loaded or are being trucked from vehicles or from part of the station to the train or aboard a connecting train that has come to a stop in the same station.

Mail should not be carried on trains not regularly authorized to carry same unless requested in writing to do so by a representative of the Railway Mail Service.

When a train is regularly authorized to carry U. S. Mail, all mail offered at stations where the Post Office Department does not maintain a Transfer Clerk or Postal Clerk should be accepted regardless of the space authorized.

When a regular authorization is exceeded from any station at which the Post Office Department maintain a Transfer Clerk or Postal Clerk, the trainmen should secure a written request covering such excess. Failure to receive such request should be reported on the trip report of mail carried.

The Post Office Department Regulations provide the number of sacks, equivalent to units of space authorized as follows:

1 to 46 sacks..... 3 ft.	231 to 276 sacks..... 18 ft.
47 to 92 sacks..... 6 ft.	277 to 322 sacks..... 21 ft.
93 to 138 sacks..... 9 ft.	323 to 368 sacks..... 24 ft.
139 to 184 sacks..... 12 ft.	369 to 414 sacks..... 27 ft.
185 to 230 sacks..... 15 ft.	415 to 460 sacks..... 30 ft.

¾ outside parcels equal one sack, except one box of baby chicks equals one sack and should be reported in the "Sacked" columns of train baggageman's report, Form Ar-702.

Utmost care must be used in handling fragile (red label) parcel post mail.

Mail pouches delivered unlocked must not be accepted but returned to Post Office Department, and immediate advice given to Superintendent by wire.

When mail arrives late at night, or when Government messenger is not on hand to receive it, it must be kept in a safe place until proper delivery can be made.

If a mail pouch is stolen, immediate advice must be given to Superintendent by wire.

U. S. Mail Clerks, required to deadhead on mail trains, will be permitted to ride in crew coach on presentation of their travel commission.

Train crews are not permitted to ride in Railway Post Office cars while in use, even though the railroad company may furnish a Railway Post Office car larger than the size authorized.

All full mail cars and parts of cars having the legend "United States Mail" or "U. S. Mail" shall be reserved exclusively for carrying the mails and shall not be used for any other purpose.

916. HEATING, LIGHTING, VENTILATION AND AIR CONDITIONING OF CARS.

Rules for the Operation and Supervision of Steam Heat Equipment. Current Rules govern.

The application of Steam Heat Equipment Rule No. 1724 is as follows:

Approaching	Direction	Open rear end train pipe valve	Engineman shut off steam at
Toledo	Westward	Fassett St.	River Bridge
	Eastward	Fearing St.	Swan Creek
	Eastward	Z Tower	Swan Creek
Elkhart Elkhart (OR)	Westward	Hively Ave.	Home Signal B
	Westward	Signal 437.1	Home Signal B

Rear end train pipe valve must be opened gradually to full open position when blowing out steam line to avoid metal gaskets being blown out.

When one or more of the first five cars in train are equipped with rubber steam hose and 130 pounds steam pressure is not sufficient to properly heat the train, pressure may be increased to 150 pounds. Steam Heat Equipment Rules Nos. 1706, 1707 and 1712 are modified accordingly.

Before steam pressure is connected to standing cars train line valve must be closed at opposite end of line.

917. PASSENGER BRAKEMEN.

Rear brakemen of passenger trains will be governed as follows:

When rear car is	And car next ahead is	Carry equipment in following location:	
		Storm clothing	Container and lanterns
Pullman Obs., Private or Official eLuxe Obs., Coach, Diner	Pullman	On door catch of aisle door next to rear car if drawing room is next to rear car. If not, place in rear vestibule of car next to rear.	Rear vestibule of car next to rear out of passageway and so placed as to avoid inconvenience to passengers using vestibule.
	Pullman		
	Pullman		
	Coach	Rear of coach.	Rear of coach.
Pullman without observation end.		On door catch of aisle door at rear of train.	Rear vestibule. so placed as to avoid inconvenience to persons using vestibule.

When more than one private car, conductor will instruct rear brakeman where equipment will be carried.

Grips or other personal effects not required in line of duty must not be carried at rear of train.

HAND BRAKE TEST.

A running test of hand brakes must be made on a motor car upon leaving initial terminal when operating as a single unit. As soon as speed permits engineman must shut off power and signal for brakes. The Conductor or member of train crew must then apply hand brakes to determine if they are operating properly. In case hand brakes do not operate properly, motor car must proceed at restricted speed to the nearest point at which repairs can be made.

1056. JOURNAL BOXES.

Current "Instructions for the Lubrication and Care of Journal Boxes" govern.

When a journal is found overheating enroute, train must be stopped and examination made. Packing must be adjusted or box repacked if this will overcome trouble. If cause of heating cannot be corrected in this manner or car cannot be moved to the next terminal through the use of cooling compound, car should be set out.

Water or snow should not be used for cooling hot journals except in emergency, and when used, journal should be cooled as slowly as conditions will permit.

When cars with hot journals are set out where inspectors do not take immediate charge, precaution must be taken to know that journal is left in condition to avoid damage to car by fire.

Conductor must make prompt report to Superintendent and car foreman of cars treated enroute, or set out account overheated journal, stating whether treated by cooling compound or by water or snow.

COOLING COMPOUND.

An approved hot journal cooling compound, and Form N. Y. C. S. FS-74 furnished by storekeeper, shall be carried as part of caboose equipment on all freight trains, and carried in containers provided on all locomotives in passenger service.

Cooling compound shall be used for emergency treatment of overheated journals of cars enroute in trains. Treatment should be given before journal becomes red.

Journals with broken brasses shall not be treated with cooling compound.

When applying cooling compound, packing in journal box should be loosened by use of packing iron, after which, cooling compound shall be applied along full length of rising side of journal; particular attention to be given to placing compound at back or inside end of journal.

Cars having journals treated with cooling compound shall be tagged in a prominent place near journal box, using Form N.Y.C.S. RS-74, at time compound is applied.

FATALITIES.

When a passenger dies in a sleeping car, the body may be left in berth properly screened until removed from train; when in parlor car or coach, body should be removed to baggage car and physician secured if available on train, who may certify as to cause of death.

The body of a person who dies on a train must be left at first station stop where a Health Officer is available and station employe on duty. Station employe must not permit the body to be removed from station without proper authority. If person who dies is accompanied by an attendant, conductor must confer with attendant as to disposition of body, and such information must be given to the station employe.

If train stops at a station other than where the body can be removed, conductor will give advance notice to the station where the body is to be left, and station employe must notify Health Officer promptly.

MOVEMENT OF DEAD ENGINES IN TRAINS.

Rules for Operation and Supervision of Air Brake and Train Air Signal. Current Rules govern.

All engines equipped with side rods must have them applied when handled dead in trains, suitable washers, of wooden block clamped together with bolts, being used where necessary on main rod bearings to keep the side rods in place.

ENGINE AND CAR RESTRICTIONS.
Rail Detector Cars
 Rail Detector Cars must not be handled in freight trains and, except NYC car X-8015, must not be handled in passenger trains. Following will govern when Rail Detector Cars are moving under their own power:
 In Automatic or Manual Block System territory Train Dispatcher will arrange for Absolute Block between open signal stations for movements following such cars.
 Cars approaching highway crossings which are provided with automatic protection, must not pass over crossings until manual protection is provided unless it is known that the automatic protection is functioning.
 At Railroad crossings where automatic interlocking is in use, such cars will come to a stop and must not proceed over crossings until all instructions covering emergency use of such crossings have been complied with.
 Signalmen at interlocking stations must not operate any switches in the route lined for such cars while within interlocking limits.
 In Automatic Train Stop territory, if car is not equipped with Automatic Train Stop device, movements will be authorized and made according to Timetable Special Instructions governing such moves, except that Train Dispatchers will arrange for clear block between open signal stations both in advance and in rear of train.
 Steam engines must not be coupled head on when double heading or running light. In case of emergency, instructions should be obtained from Superintendent.
 Enginemen operating engines equipped with storm windshield wings must have windshields closed when operating in yards or on side tracks.
 Motors in damaged condition making them unfit to be operated at speeds specified in special instruction, "Speed Restrictions," must be hauled separately.
LaCarne:
 Camp Perry Tracks..... Diesels DCA, DCB, DFA, DFB, DPA, DPB, must stop at buildings and proceed with care.

AUTOMATIC TRAIN STOP.

Enginemen and firemen must be qualified on Rules for the Operation of Automatic Train Stop.

Road engines and motors, operated between BE and Vickers, and between Nasby and B, Main Line, must be equipped with automatic train stop device in working order, and cut in, except:

- When used as pusher or second engine.
- By specific authority of Superintendent.
- When automatic train stop device becomes inoperative after leaving terminal, passenger, mail, express and milk trains must be operated at a speed not exceeding 35 miles per hour, and other trains at a speed not exceeding 20 miles per hour. Engineman must notify Superintendent at the first communicating station and relief engine, if available, must be obtained at the first engine terminal. Train may proceed at normal speed when authorized by train order. Train Dispatcher will arrange for clear block between open signal stations in advance of such train, within the limits of the train order.

When forestalling whistle fails to sound while forestalling, engineman will reduce to and operate at speed specified in Paragraph C until he has occasion to again forestall as prescribed by the rules, and the whistle sounds; normal speed may then be resumed. Failure of whistle to sound must be reported on Form SC-1.

RULES Governing Operation of Motor Cars on Main Tracks on the OLD ROAD AND NORWALK BRANCH SUPPLEMENTARY TO THE RULES FOR THE OPERATION OF TRACK MOTOR, VELOCIPEDA, HAND AND PUSH CARS Effective August 1, 1937

EFFECTIVE APRIL 1, 1948

The following instructions are supplementary to Rules for the Operation of Track Motor, Velocipeda, Hand and Push Cars, effective August 1, 1937:

Automatic and Manual Block System Territory

- Indications of block signals will not apply to track motor cars.
- The movement of track motor cars will be authorized by Signalman with Motor Car Permit Form M. Track motor cars must move preferably with the current of traffic and where possible on Slow-Speed tracks.
- A track motor car Operator, requesting permission to use main track at point other than Block Station, must state his location, name, number of track motor car and station or mile post destination, filling in Motor Car Permit Form M as authorized by Signalman, repeating same to and receiving OK from Signalman.

J. H. SPOONER, Superintendent.
 L. A. BROWN } Assistant Superintendents.

 D. J. PEASE }
 S. C. KANTOR }
 H. J. McMAHON }
 C. H. FRITZ }
 F. G. STOLTZ }
 J. H. BENSE }
 } Train Dispatchers.

- Motor Car Permit Form M will not apply for movements within yard limits. For operation within yard limits, information as to train and engine movements must be obtained from Signalman or Yardmaster.
- Track motor cars must not pass an open block station without Motor Car Permit Form M.
- A track motor car having received Motor Car Permit Form M to run from one point to another must not move in the reverse direction unless so authorized by Motor Car Permit Form M.
- Upon arrival at destination or at expiration of the time limit, track motor car must be immediately removed from main track and Signalman notified and must not again occupy main track without Motor Car Permit Form M.
- A train must not be permitted to follow a track motor car into block except as authorized by train order which will specify slow speed within the limits of the order. Train will proceed expecting to find track motor car in the territory specified.
- Track motor cars must not be admitted to a block which is occupied by an opposing train or an opposing track motor car unless movements do not involve the same portion of the block.
- Track motor cars may follow a train or another track motor car into the block.
- When more than one track motor car is to work in the same block at the same time, Signalman will give to the Operator of each car full information concerning the movements of all cars.
- Movements of track motor cars must be recorded by Signalman on block record showing track motor car number, time and station, or mile post limits. Signalman must retain copies of all permit cards.
- If, due to failure of communication, track motor car Operator is unable to communicate with Signalman, movement of track motor car must be made under such flag protection as necessary to insure safety.
- Track motor car Operator must report to Signalman if unusually delayed.
- Track motor car Operators must be examined and qualified on track motor car rules and special instructions relating thereto.
- Track motor cars must be equipped with flagman's day and night signals and, unless otherwise provided, must be equipped with portable telephones.

Manual Block System Territory

- Before issuing Motor Car Permit Form M, Signalman must ascertain limits track motor car is to travel and communicate with next Block Station in advance for control of Block. Signalman at Signal Station in advance and in the rear must protect movement by displaying Stop signals until track motor car is reported clear.
- Track motor car movements against the current of traffic will be authorized by Motor Car Permit Form M and the Signalman at each end of the block must display Stop Signals for the track occupied until the track motor car Operator or Signalman reports track motor car clear.
- If, due to failure of communication, Signalman is unable to get control of block, the movement of track motor car must be made under such flag protection as necessary to insure safety.
